"Better to run than curse the road"

Summary

Recent Software Engineering graduate (Dec 2023) transitioning from consulting-focused role to development-centric career in software development. With 1+ years full-time experience building government and commercial web applications, plus internship experience in production systems. Proven track record developing scalable solutions from requirements gathering to deployment, with expertise spanning React/TypeScript frontends, Python/Node.js backends, and cloud infrastructure.

Known for customer-centric approach, strong communication skills, and collaborative teamwork in agile environments. Passionate about translating business requirements into elegant technical solutions that drive measurable outcomes and enhance user experiences.

Work Experience

Junior Software Developer & Technical Consultant

Brisbane, Australia

AT KJR

Aug. 2024 - Present

- Designed and developed enterprise web applications for government and commercial clients, integrating multiple external APIs with React/TypeScript frontends and Python/Node.js backends while serving in dual developer-consultant capacity.
- Collaborated directly with stakeholders through requirements gathering and solution design sessions, translating business needs into scalable technical solutions across diverse database technologies (PostgreSQL, MongoDB, MySQL).
- Built and delivered full-stack applications supporting nationally-funded government initiatives including Australia's Age Assurance Technology Trial and multi-state wildlife management platforms.
- Maintained technical ownership of end-to-end development lifecycle from client consultation through production deployment, gaining valuable experience in customer-centric development approach for enterprise software.

Software Developer Intern

Brisbane, Australia

AT VISION HQ

Dec. 2022 - Dec. 2023

- Developed production-grade data processing pipelines and ensemble systems for government infrastructure monitoring, handling end-to-end workflow from data extraction and cleaning to automated analysis.
- Collaborated in 5-person agile development team to deliver scalable software solutions, participating in sprint planning, code reviews, and continuous integration practices.
- Built and deployed cloud-based applications on GCP infrastructure, gaining hands-on experience with production system development, performance optimization, and scalability considerations.
- Learned enterprise software development methodologies including CI/CD pipelines, Agile/Scrum practices, and collaborative coding standards in professional development environment.

Project Highlight

Australia Age Assurance Technology Trial – Enterprise Testing Platform

Brisbane, Australia

AT KJR

Mar. 2025 – Jun. 2025

- Designed and built enterprise testing platform for Australia's **nationally-funded** Age Assurance Technology Trial, integrating **16 diverse API providers** with standardized interface supporting government policy implementation.
- Created modular integration framework enabling rapid onboarding of new technology providers through abstraction layer, supporting both redirect-based and direct API integration patterns.
- Developed full-stack application with child-friendly UX design featuring tiled UI, secure photo capture functionality, and AWS IAM authentication for **3,300+ participants**.
- Implemented enterprise-grade security and compliance framework including data encryption, privacy policy enforcement, and PostgreSQL database with automated AWS scaling.
- Tech Stack:** React, TypeScript, Node.js (Express), PostgreSQL, AWS IAM, RESTful APIs

Wildlife Management Platform – Government Solution

AT KJR

Brisbane, Australia

Aug. 2024 – Mar. 2025

- Built scalable wildlife management platform serving VIC, QLD and ACT governments, reducing manual survey time from days to hours while maintaining operational accuracy.
- Developed enterprise-grade multi-tenant solution with dedicated application instances per client, ensuring complete data isolation and government-level security compliance.
- Created serverless processing pipeline with queue-based infrastructure featuring auto-scaling capabilities, real-time progress tracking, and automated resource management.
- **Tech Stack:** Python, AWS Lambda, SQS, S3, React, Serverless Architecture

Business Intelligence Platform – Executive Decision Support

AS FREELANCER

Remote

Mar. 2024 – Jun. 2024

- Developed automated business intelligence platform for executive leadership, aggregating **100+ daily data points** from multiple sources including Google, Reddit, and industry databases.
- Implemented AI-powered content analysis engine for automated trend identification, sentiment analysis, and strategic insight generation with reference linking for executive validation.
- Delivered streamlined executive reporting system reducing manual market research time by **80%**, enabling faster strategic decision-making through automated intelligence summaries.
- **Tech Stack:** React, Python, OpenAI API, Claude API, Vector Database, Multi-API Integration

Municipal Infrastructure Management Platform – IoT Fleet Solution

AT VISION HQ

Brisbane, Australia

Jan. 2023 - Dec. 2023

- Built enterprise IoT platform connecting **50+ municipal vehicles** through edge computing devices with 5G connectivity, enabling real-time infrastructure monitoring across Brisbane.
- Developed secure data streaming solution using GCP services for continuous fleet data ingestion and analysis.
- Created comprehensive web application with data mapping and visualization capabilities.
- Implemented automated workflow system achieving **24-hour turnaround** from data collection to actionable reports, reducing pothole repair lifecycle by **30%** and eliminating manual surveyor costs.
- **Tech Stack:** Python, GCP (Pub/Sub), Edge Computing, IoT Integration, 5G Connectivity, Web Application

Honors & Awards

- | | | |
|------|---|-----------------------|
| 2023 | Dean’s Honours List , The University of Melbourne | Melbourne, Australia |
| 2022 | Dean’s Honours List , The University of Melbourne | Melbourne, Australia |
| 2022 | Scholarship , The University of Melbourne | Melbourne, Australia |
| 2022 | 2nd place , Dota2 - Australia Esports League University | Melbourne, Australia |
| 2019 | Above & Beyond New Employee , Turner & Townsend | Brisbane, Australia |
| 2019 | Community Volunteer , Yalari Education Event | Brisbane, Australia |
| 2018 | Vice Chancellor’s List , Bond University | Gold Coast, Australia |
| 2017 | Vice Chancellor’s List , Bond University | Gold Coast, Australia |

Certificates

- | | |
|------|--|
| 2024 | Foundation Tester , International Software Testing Qualifications Board (ISTQB) |
| 2024 | Developer Associate , Azure |
| 2024 | AI Engineer Associate , Azure |
| 2023 | Cloud Practitioner , Amazon Web Services (AWS) |

Education

The University of Melbourne

MASTER OF IT (AI MAJOR) AT FACULTY OF ENGINEERING AND INFORMATION TECHNOLOGY (FEIT)

- WAM: 83/100, Graduate with Distinction

Melbourne, Australia

Jan. 2022 - Nov. 2023

Bond University

MASTER OF CONSTRUCTION PRACTICE

- GPA: 6.7/7.0, Graduate with Distinction

Gold Coast, Australia

Jan. 2017 - Nov. 2018

Griffith University

BACHELOR OF BUSINESS MANAGEMENT (TOURISM & HOSPITALITY MAJOR)

Brisbane, Australia

Oct. 2012 - Nov. 2014
